

# The Loop

C                    Am

I'm singing the blues

F                    C

While the Devil walks the earth

C                    Am

I'm singing the blues

F                    C

Wondering, what a human life is worth

G

A lonely voice

F                    C

Living in this empty verse

I'm trying to breathe

But there's evil in the air

I'm trying to breathe

But there's poison everywhere

Then when I exhale

I'm just breathing out despair

G

We're going round again

F                    C

Again and again

G

We're going round again

# The Loop

F C

Again and again

I'm sitting on the street

Watch this crazy world pass by

I'm sitting on the street

It's enough to make you cry

So lonely

Wiping the tears from my eyes

I'm stuck in this loop

Sliding back to where we begin

I'm stuck in this loop

In a glass house where stones come crashing in

Vacant eyes

Permit the senseless killing

We're going round again

Again and again

We're going round again

Again and again
