

# The Space Between Us – Little Lore

The space between us  
Looks like clear glass  
We're connected  
By more than just chance

Keep your virtue  
Bide your time  
The dreams we have  
Are worth the climb

Miles apart with souls  
In unity  
White thread binds us  
'til you come back to me

There's a light  
No one can see  
The space between us  
is energy

There's a light  
No one can see  
The space between us  
is energy

The space between us  
Shaded blue and grey  
Lands and oceans  
Are all giving way

To everything we know  
'bout destiny  
Relaxing into our own  
certainty

There's a light  
No one can see  
The space between us  
is energy
