

This Old Town

G

This old town's seen better days
This old street is tired and sorry

F

This old house will fade away
It's decay is all around me

G

This old town is full of grieving
This old house is cold and empty

F

This old street is right for leaving
No home now, not since you left me

G

F

Since you left me

This old street has broken windows
This old town is past its best
This old house has ghosts and shadows
An old hotel without a guest
This old town is full of memories
This old street's good days are passed
This old house was once a sanctuary
For a love that would not last

That would not last

C

Glass shattered street lights
Casting a half light
But there's no light in my heart
Noise rendered blue lights
The sweep of a flash light
Pulling my whole life apart

This old town's an urban wasteland
This old town is derelict
This old house is now abandoned
Nothing left to do with it
This old street is strewn with litter
This old town's is set to fail
This old house sings dark and bitter
A place where love could not prevail

Could not prevail

Glass shattered street lights
Casting a half light
But there's no light in my heart
Noise rendered blue lights
The sweep of a flash light
Pulling my whole life apart
