

Exposure

Sat with the comfort of your TV

They've got some 'dirt' for you to see

Presenter's cool and the crew are ready

Roll tape.....

He's been messing with affairs of State

But there are worms in the woodwork

That just can't wait

To get out

Somewhere in the city where the red-light glows

He's been up to 'something' and his wife doesn't know

It's about to 'come-out' on a TV show

Roll tape....

He's been messing with affairs of State

But there are worms in the woodwork

That just can't wait

To get out

Paparazzi cameras never lie

He's been sleeping with a Russian spy

Even if he thought he could put it right

The knife's in the back this time

It's titillating stuff, if that's your taste

That's something you could replicate

But the journalists know, they're on your case

New take....

You've been messing with the girls downtown

Thought you were 'the man' but you acted like a clown

Caught on the camera with your trousers down

Big mistake...
