

# Control

## VERSE

They want control  
They ask you to vote for them  
Promise it all  
But they're giving you nothing  
Once in control  
You are giving them everything  
Promises fail  
So, you won't get to vote again

They want control  
Expect you to worship them  
Push and pull  
Fall out and make up again  
Once in control  
They are the cruelest then  
Cutting you off from your family and friends

## CHORUS

In control, start to abuse you  
Call it support but, really, they're using you  
Blaming others, that's what they usually do  
Callous and cruel  
Dictating a point of view  
In control, shielding the truth from you  
Walled protection  
Designed to enlighten you  
Blaming others  
For they are corrupting you  
Wake up, wake up  
Just who is controlling you?

## BRIDGE

Step to the left, step to the right  
Once you deny the Centre,  
There is no compromise  
Step to the left, step to the right  
Once you forget the others  
You become dehumanized  
Step to the left, step to the right  
Once you forget to listen  
That's when you start to fight  
Step to the left, step to the right  
In the end they lose control  
'Coz people always change their minds
